

ESD52233

Delay-on-Make/Interval

Wiring Diagram

Description

The ESD5 Series is an accurate, solid-state, delayed interval timer. It offers a 1A steady, 10A inrush output and is available with adjustable or fixed time delays of 0.1 seconds to 1000 minutes in six ranges. Input voltages of 24, 120, or 230VAC are available. Encapsulation offers protection against shock and vibration. Adjustment options are factory fixed, onboard or externally adjustable. The repeat accuracy, under stable conditions, is 0.1%. The factory calibration of the time delay is $\pm 5\%$.

Operation (Delayed Interval)

Upon application of input voltage, the T1 delay-on-make time delay begins and the output remains de-energized. At the end of this delay, the output energizes and the T2 interval delay begins. At the end of the interval delay period, the output de-energizes.

Reset: Removing input voltage resets the output and the time delays, and returns the sequence to the first delay.

Features & Benefits

FEATURES	BENEFITS
Compact, low cost design measuring 2 in. (50.8mm) square	Allows flexibility for OEM applications and reduces component and labor costs
Microcontroller based	Repeat Accuracy + / - 0.1%, Factory calibration + / - 5%
1A steady, 10A inrush solid-state output	Provides 100 million operations in typical conditions.
Totally solid state and encapsulated	No moving parts to arc and wear out over time and encapsulated to protect against shock, vibration, and humidity

Accessories

P1004-95, P1004-95-X Versa-Pot
Panel mountable, industrial potentiometer recommended for remote time delay adjustment.

P1023-6 Mounting bracket
The 90° orientation of mounting slots makes installation/removal of modules quick and easy.

P0700-7 Versa-Knob
Designed for 0.25 in. (6.35 mm) shaft of Versa-Pot. Semi-gloss industrial black finish.

P1015-64 (AWG 14/16) Female Quick Connect
These 0.25 in. (6.35 mm) female terminals are constructed with an insulator barrel to provide strain relief.

P1015-18 Quick Connect to Screw Adapter
Screw adapter terminal designed for use with all modules with 0.25 in. (6.35 mm) male quick connect terminals.

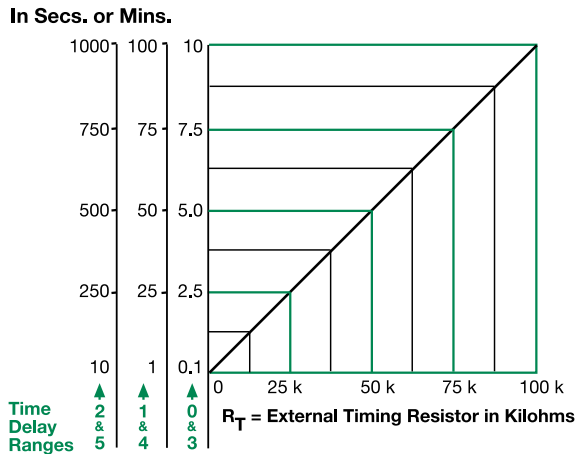

C103PM (AL) DIN Rail
35 mm aluminum DIN rail available in a 36 in. (91.4 cm) length.

P1023-20 DIN Rail Adapter
Allows module to be mounted on a 35 mm DIN type rail with two #10 screws.

ESD52233

External Resistance vs. Time Delay

This chart applies to externally adjustable part numbers.
 The time delay is adjustable over the time delay range selected by varying the resistance across the R_T terminals; as the resistance increases the time delay increases.

When selecting an external R_T, add the tolerances of the timer and the R_T for the full time range adjustment.

Examples: 1 to 50 S adjustable time delay, select time delay range 1 and a 50 K ohm R_T. For 1 to 100 S use a 100 K ohm R_T.

Function Diagram

Specifications

Time Delay Range	0.1s - 1000m in 6 adjustable ranges or fixed
Repeat Accuracy Tolerance (Factory Calibration)	±0.1% or 20ms, whichever is greater
Reset Time	≤ ±5%
Time Delay vs Temp. & Voltage	≤ 150ms
Input Voltage Tolerance	≤ ±2%
AC Line Frequency	24VAC
Power Consumption	±20%
Output Type	50/60 Hz
Rating	≤ 2VA
OFF State Leakage Current	Solid state
Protection	1A steady state, 10A inrush at 60°C
Circuitry	≅ 5mA @ 230VAC
Dielectric Breakdown	≅ 2.5V @ 1A
Insulation Resistance	Encapsulated
Mechanical Mounting	≥ 2000V RMS terminals to mounting surface
Dimensions	≥ 100 MΩ
Termination	Surface mount with one #10 (M5 x 0.8) screw
Environmental	H 50.8 mm (2"); W 50.8 mm (2");
Operating/Storage Temperature	D 30.7 mm (1.21")
Humidity	0.25 in. (6.35 mm) male quick connect terminals
Weight	-40° to 75°C / -40° to 85°C
	95% relative, non-condensing
	≅ 2.4 oz (68g)
