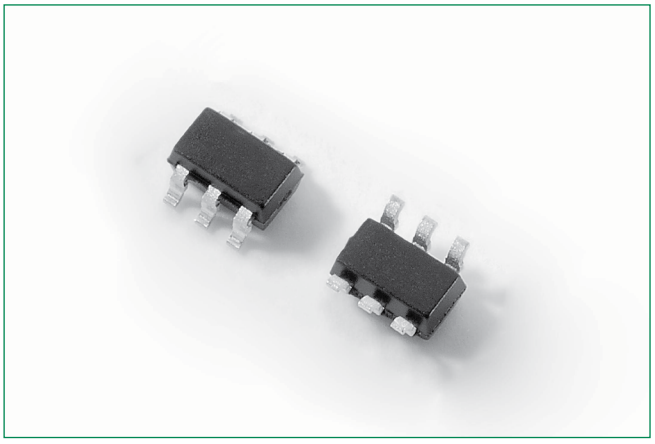
SDP Biased Series - SOT23-6

Broadband Optimized™ Protection



Description

This new SDP Biased series provides overvoltage protection for applications such as VDSL2, ADSL2, and ADSL2+ with minimal effect on data signals. This silicon design innovation results in a capacitive loading characteristic that is compatible with these high bandwidth applications. This surface mount SOT23-6 package provides a surge capability that exceeds most worldwide standards and recommendations for lightning surge withstand capability of tertiary protectors.

Features & Benefits

- Compatible with VDSL2 (30MHz) and with G.fast (106MHz)
- Balanced overvoltage protection
- Low distortion
- Low insertion loss
- Low profile
- Response time under 500ns
- RoHS Compliant
- Pb-free E3 means 2nd level interconnect is Pb-free and the terminal finish material is tin(Sn) (IPC/JEDEC J-STD-609A.01)
